| BCR-03.1  | Are strategies developed to reduce the impact of, withstand, and recover from business disruptions in accordance with risk appetite?                                                                                                                                                                                  | Yes | CSP-owned | The SaaS platform is implemented on a certified infrastructure (AgID Qualified CSP)                                           |
| BCR-04.1  | Are operational resilience strategies and capability results incorporated to establish, document, approve, communicate, apply, evaluate, and maintain a business continuity plan?                                                                                                                                     | Yes | CSP-owned |                                                                                                                               |
| BCR-05.1  | Is relevant documentation developed, identified, and acquired to support business continuity and operational resilience plans?                                                                                                                                                                                        | Yes | CSP-owned |                                                                                                                               |
| BCR-05.2  | Is business continuity and operational resilience documentation available to authorized stakeholders?                                                                                                                                                                                                                 | Yes | CSP-owned |                                                                                                                               |
| BCR-05.3  | Is business continuity and operational resilience documentation reviewed periodically?                                                                                                                                                                                                                                | Yes | CSP-owned |                                                                                                                               |
| BCR-06.1  | Are the business continuity and operational resilience plans exercised and tested at least annually and when significant changes occur?                                                                                                                                                                               | Yes | CSP-owned |                                                                                                                               |
| BCR-07.1  | Do business continuity and resilience procedures establish communication with stakeholders and participants?                                                                                                                                                                                                          |     | CSP-owned |                                                                                                                               |
| BCR-08.1  | Is cloud data periodically backed up?                                                                                                                                                                                                                                                                                 | Yes | CSP-owned | Cloud data is backed up daily in a different environment                                                                      |
| BCR-08.2  | Is the confidentiality, integrity, and availability of backup data ensured?                                                                                                                                                                                                                                           | Yes | CSP-owned | Access to data is permitted only with the right credentials. The data is also compressed and crypted.                         |
| BCR-08.3  | Can backups be restored appropriately for resiliency?                                                                                                                                                                                                                                                                 | Yes | CSP-owned |                                                                                                                               |
| BCR-09.1  | Is a disaster response plan established, documented, approved, applied, evaluated, and maintained to ensure recovery from natural and man-made disasters?                                                                                                                                                             | Yes | CSP-owned | Disaster Recovery policies and procedures are defined                                                                         |
| BCR-09.2  | Is the disaster response plan updated at least annually, and when significant changes occur?                                                                                                                                                                                                                          | Yes | CSP-owned |                                                                                                                               |
| BCR-10.1  | Is the disaster response plan exercised annually or when significant changes occur?                                                                                                                                                                                                                                   | Yes | CSP-owned |                                                                                                                               |
| BCR-10.2  | Are local emergency authorities included, if possible, in the exercise?                                                                                                                                                                                                                                               | NA  | CSP-owned |                                                                                                                               |
| BCR-II.I  | Is business-critical equipment supplemented with redundant equipment independently located at a reasonable minimum distance in accordance with applicable industry standards?                                                                                                                                         | Yes | CSP-owned | Critical components are redunded in different servers and locations. Cloud environment resides in a certified infrastructure. |
| CCC-01.1  | Are risk management policies and procedures associated with changing organizational assets including applications, systems, infrastructure, configuration, etc., established, documented, approved, communicated, applied, evaluated and maintained (regardless of whether asset management is internal or external)? | Yes | CSP-owned |                                                                                                                               |
| CCC-01.2  | Are the policies and procedures reviewed and updated at least annually?                                                                                                                                                                                                                                               | Yes | CSP-owned |                                                                                                                               |
| CCC-02.1  | Is a defined quality change control, approval and testing process (with established baselines, testing, and release standards) followed?                                                                                                                                                                              | Yes | CSP-owned |                                                                                                                               |
| CCC-03.1  | Are risks associated with changing organizational assets (including applications, systems, infrastructure, configuration, etc.) managed, regardless of whether asset management occurs internally or externally (i.e., outsourced)?                                                                                   | Yes | CSP-owned |                                                                                                                               |
| CCC-04.I  | Is the unauthorized addition, removal, update, and management of organization assets restricted?                                                                                                                                                                                                                      | Yes | CSP-owned |                                                                                                                               |

| BCR-02 | Determine the impact of business disruptions and risks to establish criteria for developing business continuity and operational resilience strategies and capabilities.                                                                                                                                                                                                                                         | Risk Assessment and Impact Analysis        |                                             |
|--------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|---------------------------------------------|
| BCR-03 | Establish strategies to reduce the impact of, withstand, and recover from business disruptions within risk appetite.                                                                                                                                                                                                                                                                                            | Business Continuity Strategy               |                                             |
| BCR-04 | Establish, document, approve, communicate, apply, evaluate and maintain a business continuity plan based on the results of the operational resilience strategies and capabilities.                                                                                                                                                                                                                              | Business Continuity Planning               |                                             |
| BCR-05 | Develop, identify, and acquire documentation that is relevant to support the business continuity and operational resilience programs. Make the documentation available to authorized stakeholders and review periodically.                                                                                                                                                                                      | Documentation                              |                                             |
| BCR-06 | Exercise and test business continuity and operational resilience plans at least annually or upon significant changes.                                                                                                                                                                                                                                                                                           | Business Continuity Exercises              | Business Continuity                         |
| BCR-07 | Establish communication with stakeholders and participants in the course of business continuity and resilience procedures.                                                                                                                                                                                                                                                                                      | Communication                              | Management and Operational Resilience       |
| BCR-08 | Periodically backup data stored in the cloud. Ensure the confidentiality, integrity and availability of the backup, and verify data restoration from backup for resiliency.                                                                                                                                                                                                                                     | Backup                                     |                                             |
| BCR-09 | Establish, document, approve, communicate, apply, evaluate and maintain a disaster response plan to recover from natural and man-made disasters. Update the plan at least annually or upon significant changes.                                                                                                                                                                                                 | Disaster Response Plan                     |                                             |
| BCR-10 | Exercise the disaster response plan annually or upon significant changes, including if possible local emergency authorities.                                                                                                                                                                                                                                                                                    | Response Plan Exercise                     |                                             |
| BCR-11 | Supplement business-critical equipment with redundant equipment independently located at a reasonable minimum distance in accordance with applicable industry standards.                                                                                                                                                                                                                                        | Equipment Redundancy                       |                                             |
| CCC-01 | Establish, document, approve, communicate, apply, evaluate and maintain policies and procedures for managing the risks associated with applying changes to organization assets, including application, systems, infrastructure, configuration, etc., regardless of whether the assets are managed internally or externally (i.e., outsourced). Review and update the policies and procedures at least annually. | Change Management Policy<br>and Procedures |                                             |
| CCC-02 | Follow a defined quality change control, approval and testing process with established baselines, testing, and release standards.                                                                                                                                                                                                                                                                               | Quality Testing                            |                                             |
| CCC-03 | Manage the risks associated with applying changes to organization assets, including application, systems, infrastructure, configuration, etc., regardless of whether the assets are managed internally or externally (i.e., outsourced).                                                                                                                                                                        | Change Management<br>Technology            |                                             |
| CCC-04 | Restrict the unauthorized addition, removal, update, and management of organization assets.                                                                                                                                                                                                                                                                                                                     | Unauthorized Change<br>Protection          | Change Control and Configuration Management |

| CCC-05.1 | Are provisions to limit changes that directly impact CSC-owned environments and require tenants to authorize requests explicitly included within the service level agreements (SLAs) between CSPs and CSCs?                                                                                                             | Yes | CSP-owned |                                                                                                                                                          |
|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| CCC-06.1 | Are change management baselines established for all relevant authorized changes on organizational assets?                                                                                                                                                                                                               | Yes | CSP-owned |                                                                                                                                                          |
| CCC-07.1 | Are detection measures implemented with proactive notification if changes deviate from established baselines?                                                                                                                                                                                                           | Yes | CSP-owned |                                                                                                                                                          |
| CCC-08.1 | Is a procedure implemented to manage exceptions, including emergencies, in the change and configuration process?                                                                                                                                                                                                        | Yes | CSP-owned |                                                                                                                                                          |

| CCC-09.1 | Is a process to proactively roll back changes to a previously known "good state" defined and implemented in case of errors or security concerns?                                                                                                                                                                        | Yes | CSP-owned | We are able to roll back thanls to code versioning, tagging and data backup                                                                              |
| CEK-01.I | Are cryptography, encryption, and key management policies and procedures established, documented, approved, communicated, applied, evaluated, and maintained?                                                                                                                                                           | Yes | CSP-owned |                                                                                                                                                          |
| CEK-01.2 | Are cryptography, encryption, and key management policies and procedures reviewed and updated at least annually?                                                                                                                                                                                                        | Yes | CSP-owned |                                                                                                                                                          |
| CEK-02.1 | Are cryptography, encryption, and key management roles and responsibilities defined and implemented?                                                                                                                                                                                                                    | Yes | CSP-owned |                                                                                                                                                          |
| CEK-03.1 | Are data at-rest and in-transit cryptographically protected using cryptographic libraries certified to approved standards?                                                                                                                                                                                              | Yes | CSP-owned | Data are encrypted in transit using TLS 1.2 and sent over HTTPS. Communications between infrastructure components over Internet are encrypted or limited |
| CEK-04.I | Are appropriate data protection encryption algorithms used that consider data classification, associated risks, and encryption technology usability?                                                                                                                                                                    | Yes | CSP-owned | within a private network between                                                                                                                         |
| CEK-05.I | Are standard change management procedures established to review, approve, implement and communicate cryptography, encryption, and key management technology changes that accommodate internal and external sources?                                                                                                     | Yes | CSP-owned |                                                                                                                                                          |
| CEK-06.1 | Are changes to cryptography-, encryption- and key management-related systems, policies, and procedures, managed and adopted in a manner that fully accounts for downstream effects of proposed changes, including residual risk, cost, and benefits analysis?                                                           | Yes | CSP-owned |                                                                                                                                                          |
| CEK-07.I | Is a cryptography, encryption, and key management risk program established and maintained that includes risk assessment, risk treatment, risk context, monitoring, and feedback provisions?                                                                                                                             | Yes | CSP-owned |                                                                                                                                                          |
| CEK-08.I | Are CSPs providing CSCs with the capacity to manage their own data encryption keys?                                                                                                                                                                                                                                     | No  | CSP-owned |                                                                                                                                                          |
| CEK-09.1 | Are encryption and key management systems, policies, and processes audited with a frequency proportional to the system's risk exposure, and after any security event?                                                                                                                                                   | Yes | CSP-owned |                                                                                                                                                          |
| CEK-09.2 | Are encryption and key management systems, policies, and processes audited (preferably continuously but at least annually)?                                                                                                                                                                                             | Yes | CSP-owned |                                                                                                                                                          |
| CEK-10.1 | Are cryptographic keys generated using industry-accepted and approved cryptographic libraries that specify algorithm strength and random number generator specifications?                                                                                                                                               | Yes | CSP-owned |                                                                                                                                                          |
| CEK-II.I | Are private keys provisioned for a unique purpose managed, and is cryptography secret?                                                                                                                                                                                                                                  | Yes | CSP-owned |                                                                                                                                                          |
| CEK-12.1 | Are cryptographic keys rotated based on a cryptoperiod calculated while considering information disclosure risks and legal and regulatory requirements?                                                                                                                                                                 | Yes | CSP-owned |                                                                                                                                                          |
| CEK-13.1 | Are cryptographic keys revoked and removed before the end of the established cryptoperiod (when a key is compromised, or an entity is no longer part of the organization) per defined, implemented, and evaluated processes, procedures, and technical measures to include legal and regulatory requirement provisions? | Yes | CSP-owned |                                                                                                                                                          |

| CCC-05 | Include provisions limiting changes directly impacting CSCs owned environments/tenants to explicitly authorized requests within service level agreements between CSPs and CSCs.                                                                                                                                      | Change Agreements                                         |                                            |
|--------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------|--------------------------------------------|
| CCC-06 | Establish change management baselines for all relevant authorized changes on organization assets.                                                                                                                                                                                                                    | Change Management<br>Baseline                             |                                            |
| CCC-07 | Implement detection measures with proactive notification in case of changes deviating from the established baseline.                                                                                                                                                                                                 | Detection of Baseline Deviation                           |                                            |
| CCC-08 | 'Implement a procedure for the management of exceptions, including emergencies, in the change and configuration process. Align the procedure with the requirements of GRC-04: Policy Exception Process.'                                                                                                             | Exception Management                                      |                                            |
| CCC-09 | Define and implement a process to proactively roll back changes to a previous known good state in case of errors or security concerns.                                                                                                                                                                               | Change Restoration                                        |                                            |
| CEK-01 | Establish, document, approve, communicate, apply, evaluate and maintain policies and procedures for Cryptography, Encryption and Key Management. Review and update the policies and procedures at least annually.                                                                                                    | Encryption and Key<br>Management Policy and<br>Procedures |                                            |
| CEK-02 | Define and implement cryptographic, encryption and key management roles and responsibilities.                                                                                                                                                                                                                        | CEK Roles and<br>Responsibilities                         |                                            |
| CEK-03 | Provide cryptographic protection to data at-rest and in-transit, using cryptographic libraries certified to approved standards.                                                                                                                                                                                      | Data Encryption                                           |                                            |
| CEK-04 | Use encryption algorithms that are appropriate for data protection, considering the classification of data, associated risks, and usability of the encryption technology.                                                                                                                                            | Encryption Algorithm                                      |                                            |
| CEK-05 | Establish a standard change management procedure, to accommodate changes from internal and external sources, for review, approval, implementation and communication of cryptographic, encryption and key management technology changes.                                                                              | Encryption Change<br>Management                           |                                            |
| CEK-06 | Manage and adopt changes to cryptography-, encryption-, and key management-related systems (including policies and procedures) that fully account for downstream effects of proposed changes, including residual risk, cost, and benefits analysis.                                                                  | Encryption Change Cost<br>Benefit Analysis                |                                            |
| CEK-07 | Establish and maintain an encryption and key management risk program that includes provisions for risk assessment, risk treatment, risk context, monitoring, and feedback.                                                                                                                                           | Encryption Risk Management                                |                                            |
| CEK-08 | CSPs must provide the capability for CSCs to manage their own data encryption keys.                                                                                                                                                                                                                                  | CSC Key Management<br>Capability                          |                                            |
| CEK-09 | Audit encryption and key management systems, policies, and processes with a frequency that is proportional to the risk exposure of the system with audit occurring preferably continuously but at least annually and after any security event(s).                                                                    | Encryption and Key<br>Management Audit                    |                                            |
| CEK-10 | Generate Cryptographic keys using industry accepted cryptographic libraries specifying the algorithm strength and the random number generator used.                                                                                                                                                                  | Key Generation                                            |                                            |
| CEK-11 | Manage cryptographic secret and private keys that are provisioned for a unique purpose.                                                                                                                                                                                                                              | Key Purpose                                               |                                            |
| CEK-12 | Rotate cryptographic keys in accordance with the calculated cryptoperiod, which includes provisions for considering the risk of information disclosure and legal and regulatory requirements.                                                                                                                        | Key Rotation                                              | Cryptography, Encryption 8  Key Management |
| CEK-13 | Define, implement and evaluate processes, procedures and technical measures to revoke and remove cryptographic keys prior to the end of its established cryptoperiod, when a key is compromised, or an entity is no longer part of the organization, which include provisions for legal and regulatory requirements. | Key Revocation                                            |                                            |
|        |                                                                                                                                                                                                                                                                                                                      |                                                           |                                            |

| CEK-14.1             | Are processes, procedures and technical measures to destroy unneeded keys defined, implemented and evaluated to address key destruction outside secure environments, revocation of keys stored in hardware security modules (HSMs), and include applicable legal and regulatory requirement provisions?                                                                                                                                                                                                                                                                     | Yes | CSP-owned            |                                                                                                           |  |

| CEK-14 | Define, implement and evaluate processes, procedures and technical measures to destroy keys stored outside a secure environment and revoke keys stored in Hardware Security Modules (HSMs) when they are no longer needed, which include provisions for legal and regulatory requirements.                                                                                                 | Key Destruction                                             |
|--------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------|
| CEK-15 | Define, implement and evaluate processes, procedures and technical measures to create keys in a pre-activated state when they have been generated but not authorized for use, which include provisions for legal and regulatory requirements.                                                                                                                                              | Key Activation                                              |
| CEK-16 | Define, implement and evaluate processes, procedures and technical measures to monitor, review and approve key transitions from any state to/from suspension, which include provisions for legal and regulatory requirements.                                                                                                                                                              | Key Suspension                                              |
| CEK-17 | Define, implement and evaluate processes, procedures and technical measures to deactivate keys at the time of their expiration date, which include provisions for legal and regulatory requirements.                                                                                                                                                                                       | Key Deactivation                                            |
| CEK-18 | Define, implement and evaluate processes, procedures and technical measures to manage archived keys in a secure repository requiring least privilege access, which include provisions for legal and regulatory requirements.                                                                                                                                                               | Key Archival                                                |
| CEK-19 | Define, implement and evaluate processes, procedures and technical measures to use compromised keys to encrypt information only in controlled circumstance, and thereafter exclusively for decrypting data and never for encrypting data, which include provisions for legal and regulatory requirements.                                                                                  | Key Compromise                                              |
| CEK-20 | Define, implement and evaluate processes, procedures and technical measures to assess the risk to operational continuity versus the risk of the keying material and the information it protects being exposed if control of the keying material is lost, which include provisions for legal and regulatory requirements.                                                                   | Key Recovery                                                |
| CEK-21 | Define, implement and evaluate processes, procedures and technical measures in order for the key management system to track and report all cryptographic materials and changes in status, which include provisions for legal and regulatory requirements.                                                                                                                                  | Key Inventory Management                                    |
| DCS-01 | Establish, document, approve, communicate, apply, evaluate and maintain policies and procedures for the secure disposal of equipment used outside the organization's premises. If the equipment is not physically destroyed a data destruction procedure that renders recovery of information impossible must be applied. Review and update the policies and procedures at least annually. | Off-Site Equipment Disposal<br>Policy and Procedures        |
| DCS-02 | Establish, document, approve, communicate, apply, evaluate and maintain policies and procedures for the relocation or transfer of hardware, software, or data/information to an offsite or alternate location. The relocation or transfer request requires the written or cryptographically verifiable authorization. Review and update the policies and procedures at least annually.     | Off-Site Transfer<br>Authorization Policy and<br>Procedures |
| DCS-03 | Establish, document, approve, communicate, apply, evaluate and maintain policies and procedures for maintaining a safe and secure working environment in offices, rooms, and facilities. Review and update the policies and procedures at least annually.                                                                                                                                  | Secure Area Policy and<br>Procedures                        |

| DCS-04.1  | Are policies and procedures for the secure transportation of physical media established, documented, approved, communicated, enforced, evaluated, and maintained?                                                                                                               | Yes | Shared CSP and CSC |                                                                            |
|-----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|--------------------|----------------------------------------------------------------------------|
| DCS-04.2  | Are policies and procedures for the secure transportation of physical media reviewed and updated at least annually?                                                                                                                                                             | Yes | Shared CSP and CSC |                                                                            |
| DCS-05.1  | Is the classification and documentation of physical and logical assets based on the organizational business risk?                                                                                                                                                               | Yes | Shared CSP and CSC |                                                                            |
| DCS-06.1  | Are all relevant physical and logical assets at all CSP sites cataloged and tracked within a secured system?                                                                                                                                                                    | Yes | Shared CSP and CSC |                                                                            |
| DCS-07.1  | Are physical security perimeters implemented to safeguard personnel, data, and information systems?                                                                                                                                                                             | Yes | CSP-owned          | Physical security measures are also adopted by the infrastructure provider |
| DCS-07.2  | Are physical security perimeters established between administrative and business areas, data storage, and processing facilities?                                                                                                                                                | No  | CSP-owned          |                                                                            |
| DCS-08.1  | Is equipment identification used as a method for connection authentication?                                                                                                                                                                                                     | No  | CSP-owned          |                                                                            |
| DCS-09.1  | Are solely authorized personnel able to access secure areas, with all ingress and egress areas restricted, documented, and monitored by physical access control mechanisms?                                                                                                     | Yes | CSP-owned          |                                                                            |
| DCS-09.2  | Are access control records retained periodically, as deemed appropriate by the organization?                                                                                                                                                                                    | Yes | CSP-owned          |                                                                            |
| DCS-10.1  | Are external perimeter datacenter surveillance systems and surveillance systems at all ingress and egress points implemented, maintained, and operated?                                                                                                                         | Yes | CSP-owned          |                                                                            |
| DC\$-11.1 | Are datacenter personnel trained to respond to unauthorized access or egress attempts?                                                                                                                                                                                          | Yes | CSP-owned          |                                                                            |
| DCS-12.1  | Are processes, procedures, and technical measures defined, implemented, and evaluated to ensure risk-based protection of power and telecommunication cables from interception, interference, or damage threats at all facilities, offices, and rooms?                           | Yes | CSP-owned          |                                                                            |
| DCS-13.1  | Are data center environmental control systems designed to monitor, maintain, and test that on-site temperature and humidity conditions fall within accepted industry standards effectively implemented and maintained?                                                          | Yes | CSP-owned          | By the data center infrastructure provider                                 |
| DCS-14.1  | Are utility services secured, monitored, maintained, and tested at planned intervals for continual effectiveness?                                                                                                                                                               | Yes | CSP-owned          |                                                                            |
| DC\$-15.1 | Is business-critical equipment segregated from locations subject to a high probability of environmental risk events?                                                                                                                                                            | Yes | CSP-owned          |                                                                            |
| DSP-01.1  | Are policies and procedures established, documented, approved, communicated, enforced, evaluated, and maintained for the classification, protection, and handling of data throughout its lifecycle according to all applicable laws and regulations, standards, and risk level? | Yes | CSP-owned          | In compliance with GDPR                                                    |
| DSP-01.2  | Are data security and privacy policies and procedures reviewed and updated at least annually?                                                                                                                                                                                   | Yes | CSP-owned          |                                                                            |
| DSP-02.1  | Are industry-accepted methods applied for secure data disposal from storage media so information is not recoverable by any forensic means?                                                                                                                                      | Yes | CSP-owned          |                                                                            |
| DSP-03.I  | Is a data inventory created and maintained for sensitive and personal information (at a minimum)?                                                                                                                                                                               | No  | CSP-owned          |                                                                            |
| DSP-04.I  | Is data classified according to type and sensitivity levels?                                                                                                                                                                                                                    | Yes | CSP-owned          | In compliance with GDPR                                                    |
| DSP-05.1  | Is data flow documentation created to identify what data is processed and where it is stored and transmitted?                                                                                                                                                                   | Yes | CSP-owned          |                                                                            |
| DSP-05.2  | Is data flow documentation reviewed at defined intervals, at least annually, and after any change?                                                                                                                                                                              | Yes | CSP-owned          |                                                                            |

| HRS-09.1  | Are employee roles and responsibilities relating to information assets and security documented and communicated?                                                                                                                                                        | Yes | CSP-owned |                                                                                       |
| HRS-10.1  | Are requirements for non-disclosure/confidentiality agreements reflecting organizational data protection needs and operational details identified, documented, and reviewed at planned intervals?                                                                       | Yes | CSP-owned |                                                                                       |
| HRS-II.I  | Is a security awareness training program for all employees of the organization established, documented, approved, communicated, applied, evaluated and maintained?                                                                                                      | No  | CSP-owned |                                                                                       |
| HRS-11.2  | Are regular security awareness training updates provided?                                                                                                                                                                                                               | No  | CSP-owned |                                                                                       |
| HRS-12.1  | Are all employees granted access to sensitive organizational and personal data provided with appropriate security awareness training?                                                                                                                                   | Yes | CSP-owned |                                                                                       |
| HRS-12.2  | Are all employees granted access to sensitive organizational and personal data provided with regular updates in procedures, processes, and policies relating to their professional function?                                                                            | Yes | CSP-owned |                                                                                       |
| HRS-13.1  | Are employees notified of their roles and responsibilities to maintain awareness and compliance with established policies, procedures, and applicable legal, statutory, or regulatory compliance obligations?                                                           | Yes | CSP-owned |                                                                                       |
| IAM-01.1  | Are identity and access management policies and procedures established, documented, approved, communicated, implemented, applied, evaluated, and maintained?                                                                                                            | Yes | CSP-owned |                                                                                       |
| IAM-01.2  | Are identity and access management policies and procedures reviewed and updated at least annually?                                                                                                                                                                      | Yes | CSP-owned |                                                                                       |
| IAM-02.1  | Are strong password policies and procedures established, documented, approved, communicated, implemented, applied, evaluated, and maintained?                                                                                                                           | Yes | CSP-owned |                                                                                       |
| IAM-02.2  | Are strong password policies and procedures reviewed and updated at least annually?                                                                                                                                                                                     | Yes | CSP-owned |                                                                                       |
| IAM-03.1  | Is system identity information and levels of access managed, stored, and reviewed?                                                                                                                                                                                      | Yes | CSP-owned |                                                                                       |
| IAM-04.1  | Is the separation of duties principle employed when implementing information system access?                                                                                                                                                                             | Yes | CSP-owned |                                                                                       |
| IAM-05.1  | Is the least privilege principle employed when implementing information system access?                                                                                                                                                                                  | Yes | CSP-owned |                                                                                       |
| IAM-06.1  | Is a user access provisioning process defined and implemented which authorizes, records, and communicates data and assets access changes?                                                                                                                               | Yes | CSP-owned |                                                                                       |
| IAM-07.1  | Is a process in place to de-provision or modify the access, in a timely manner, of movers / leavers or system identity changes, to effectively adopt and communicate identity and access management policies?                                                           | Yes | CSP-owned |                                                                                       |
| IAM-08.1  | Are reviews and revalidation of user access for least privilege and separation of duties completed with a frequency commensurate with organizational risk tolerance?                                                                                                    | Yes | CSP-owned |                                                                                       |
| IAM-09. I | Are processes, procedures, and technical measures for the segregation of privileged access roles defined, implemented, and evaluated such that administrative data access, encryption, key management capabilities, and logging capabilities are distinct and separate? | Yes | CSP-owned |                                                                                       |
| IAM-10.1  | Is an access process defined and implemented to ensure privileged access roles and rights are granted for a limited period?                                                                                                                                             | Yes | CSP-owned |                                                                                       |
| IAM-10.2  | Are procedures implemented to prevent the culmination of segregated privileged access?                                                                                                                                                                                  | Yes | CSP-owned |                                                                                       |

| HRS-08 | The organization includes within the employment agreements provisions and/or terms for adherence to established information governance and security policies.                                                                                                                | Employment Agreement  Content                          |                                 |
|--------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------|---------------------------------|
| HRS-09 | Document and communicate roles and responsibilities of employees, as they relate to information assets and security.                                                                                                                                                         | Personnel Roles and<br>Responsibilities                |                                 |
| HRS-10 | Identify, document, and review, at planned intervals, requirements for non-disclosure/confidentiality agreements reflecting the organization's needs for the protection of data and operational details.                                                                     | Non-Disclosure Agreements                              |                                 |
| HRS-11 | Establish, document, approve, communicate, apply, evaluate and maintain a security awareness training program for all employees of the organization and provide regular training updates.                                                                                    | Security Awareness Training                            |                                 |
| HRS-12 | Provide all employees with access to sensitive organizational and personal data with appropriate security awareness training and regular updates in organizational procedures, processes, and policies relating to their professional function relative to the organization. | Personal and Sensitive Data Awareness and Training     |                                 |
| HRS-13 | Make employees aware of their roles and responsibilities for maintaining awareness and compliance with established policies and procedures and applicable legal, statutory, or regulatory compliance obligations.                                                            | Compliance User<br>Responsibility                      |                                 |
| IAM-01 | Establish, document, approve, communicate, implement, apply, evaluate and maintain policies and procedures for identity and access management. Review and update the policies and procedures at least annually.                                                              | Identity and Access  Management Policy and  Procedures |                                 |
| IAM-02 | Establish, document, approve, communicate, implement, apply, evaluate and maintain strong password policies and procedures. Review and update the policies and procedures at least annually.                                                                                 | Strong Password Policy and Procedures                  |                                 |
| IAM-03 | Manage, store, and review the information of system identities, and level of access.                                                                                                                                                                                         | Identity Inventory                                     |                                 |
| IAM-04 | Employ the separation of duties principle when implementing information system access.                                                                                                                                                                                       | Separation of Duties                                   |                                 |
| IAM-05 | Employ the least privilege principle when implementing information system access.                                                                                                                                                                                            | Least Privilege                                        |                                 |
| IAM-06 | Define and implement a user access provisioning process which authorizes, records, and communicates access changes to data and assets.                                                                                                                                       | User Access Provisioning                               |                                 |
| IAM-07 | De-provision or respectively modify access of movers / leavers or system identity changes in a timely manner in order to effectively adopt and communicate identity and access management policies.                                                                          | User Access Changes and<br>Revocation                  |                                 |
| IAM-08 | Review and revalidate user access for least privilege and separation of duties with a frequency that is commensurate with organizational risk tolerance.                                                                                                                     | User Access Review                                     |                                 |
| IAM-09 | Define, implement and evaluate processes, procedures and technical measures for the segregation of privileged access roles such that administrative access to data, encryption and key management capabilities and logging capabilities are distinct and separated.          | Segregation of Privileged<br>Access Roles              |                                 |
| IAM-10 | Define and implement an access process to ensure privileged access roles and rights are granted for a time limited period, and implement procedures to prevent the culmination of segregated privileged access.                                                              | Management of Privileged Access Roles                  | Identity & Access<br>Management |

|          |                                                                                                                                                                                                                                                      | NIA | CCD average |                           |
|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-------------|---------------------------|
| IAM-II.I | Are processes and procedures for customers to participate, where applicable, in granting access for agreed, high risk as (defined by the organizational risk assessment) privileged access roles defined, implemented and evaluated?                 | NA  | CSP-owned   |                           |
| IAM-12.1 | Are processes, procedures, and technical measures to ensure the logging infrastructure is "read-only" for all with write access (including privileged access roles) defined, implemented, and evaluated?                                             | NA  | CSP-owned   |                           |
| IAM-12.2 | Is the ability to disable the "read-only" configuration of logging infrastructure controlled through a procedure that ensures the segregation of duties and break glass procedures?                                                                  | NA  | CSP-owned   |                           |
| IAM-13.1 | Are processes, procedures, and technical measures that ensure users are identifiable through unique identification (or can associate individuals with user identification usage) defined, implemented, and evaluated?                                | Yes | CSP-owned   |                           |
| IAM-14.1 | Are processes, procedures, and technical measures for authenticating access to systems, application, and data assets including multifactor authentication for a least-privileged user and sensitive data access defined, implemented, and evaluated? | Yes | CSP-owned   |                           |
| IAM-14.2 | Are digital certificates or alternatives that achieve an equivalent security level for system identities adopted?                                                                                                                                    | Yes | CSP-owned   |                           |
| IAM-15.1 | Are processes, procedures, and technical measures for the secure management of passwords defined, implemented, and evaluated?                                                                                                                        | Yes | CSP-owned   |                           |
| IAM-16.1 | Are processes, procedures, and technical measures to verify access to data and system functions authorized, defined, implemented, and evaluated?                                                                                                     | Yes | CSP-owned   |                           |
| IPY-01.1 | Are policies and procedures established, documented, approved, communicated, applied, evaluated, and maintained for communications between application services (e.g., APIs)?                                                                        | Yes | CSP-owned   |                           |
| IPY-01.2 | Are policies and procedures established, documented, approved, communicated, applied, evaluated, and maintained for information processing interoperability?                                                                                         | Yes | CSP-owned   |                           |
| IPY-01.3 | Are policies and procedures established, documented, approved, communicated, applied, evaluated, and maintained for application development portability?                                                                                             | Yes | CSP-owned   |                           |
| IPY-01.4 | Are policies and procedures established, documented, approved, communicated, applied, evaluated, and maintained for information/data exchange, usage, portability, integrity, and persistence?                                                       | Yes | CSP-owned   |                           |
| IPY-01.5 | Are interoperability and portability policies and procedures reviewed and updated at least annually?                                                                                                                                                 | Yes | CSP-owned   |                           |
| IPY-02.1 | Are CSCs able to programmatically retrieve their data via an application interface(s) to enable interoperability and portability?                                                                                                                    | No  | CSP-owned   | It is available on demand |
| IPY-03.1 | Are cryptographically secure and standardized network protocols implemented for the management, import, and export of data?                                                                                                                          | Yes | CSP-owned   |                           |

|         | Define, implement and evaluate processes and procedures for customers to participate, where applicable, in the granting of access for agreed, high                                                                                                                                                                                                                                                                                                  |                                                        |                                |
|---------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------|--------------------------------|
| IAM-I I | risk (as defined by the organizational risk assessment) privileged access roles.                                                                                                                                                                                                                                                                                                                                                                    | CSCs Approval for Agreed Privileged Access Roles       |                                |
| IAM-12  | Define, implement and evaluate processes, procedures and technical measures to ensure the logging infrastructure is read-only for all with write access, including privileged access roles, and that the ability to disable it is controlled through a procedure that ensures the segregation of duties and break glass procedures.                                                                                                                 | Safeguard Logs Integrity                               |                                |
| IAM-13  | Define, implement and evaluate processes, procedures and technical measures that ensure users are identifiable through unique IDs or which can associate individuals to the usage of user IDs.                                                                                                                                                                                                                                                      | Uniquely Identifiable Users                            |                                |
| IAM-14  | Define, implement and evaluate processes, procedures and technical measures for authenticating access to systems, application and data assets, including multifactor authentication for at least privileged user and sensitive data access. Adopt digital certificates or alternatives which achieve an equivalent level of security for system identities.                                                                                         | Strong Authentication                                  |                                |
| IAM-15  | Define, implement and evaluate processes, procedures and technical measures for the secure management of passwords.                                                                                                                                                                                                                                                                                                                                 | Passwords Management                                   |                                |
| IAM-16  | Define, implement and evaluate processes, procedures and technical measures to verify access to data and system functions is authorized.                                                                                                                                                                                                                                                                                                            | Authorization Mechanisms                               |                                |
| IPY-01  | Establish, document, approve, communicate, apply, evaluate and maintain policies and procedures for interoperability and portability including requirements for:  a. Communications between application interfaces  b. Information processing interoperability c. Application development portability d. Information/Data exchange, usage, portability, integrity, and persistence Review and update the policies and procedures at least annually. | Interoperability and Portability Policy and Procedures | Interoperability & Portability |
| IPY-02  | Provide application interface(s) to CSCs so that they programmatically retrieve their data to enable interoperability and portability.                                                                                                                                                                                                                                                                                                              | Application Interface<br>Availability                  |                                |
| IPY-03  | Implement cryptographically secure and standardized network protocols for the management, import and export of data.                                                                                                                                                                                                                                                                                                                                | Secure Interoperability and Portability Management     |                                |

|          |                                                                                                                                                                                                                                             | ٦., |           |                                                                     |
|----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|---------------------------------------------------------------------|
| IPY-04.1 | Do agreements include provisions specifying CSC data access upon contract termination, and have the following?  a. Data format  b. Duration data will be stored  c. Scope of the data retained and made available to the CSCs               | Yes | CSP-owned |                                                                     |
